

Angel Gonzalez

Product-Minded Full-Stack Developer

Los Angeles, CA | gonzalezangel0510@yahoo.com | github.com/hellsangel05 | portfolio-site-green-xi.vercel.app

SUMMARY

Product-minded full-stack developer and co-founder with hands-on experience taking web and mobile products from concept through interface design, implementation, database architecture, AI integration, and deployment. Seeking a junior product engineering, prototyping, or creative-technology role.

SELECTED ENGINEERING PROJECTS

Raidio | AI media platform | **Case study**

- Built synchronized radio playback, station studios, generated-music workflows, voice hosts, catalogs, libraries, and resilient rundown publishing with Next.js, TypeScript, Supabase, and PostgreSQL.

Snapdex | Creator economy and game | **Case study**

- Built uploads, rarity tiers, packs, collections, trading, marketplace flows, creator royalties, supply burns, and deterministic arena battles with atomic database operations.

Jump Trainer | Computer vision coaching | **Case study**

- Built an Expo mobile experience and Python analysis service that estimates vertical jump from flight-time physics, reports confidence, rejects unreliable clips, and creates training plans.

PRODUCT-BUILDING EXPERIENCE

ADGO Ventures | Co-Founder / Full-Stack Product Developer | **Present**

- Translate product concepts into user flows, technical plans, responsive interfaces, database-backed applications, and deployed builds across media, creator tools, sports, civic technology, and community products.
- Design and implement systems including shared media playback, creator economies, semantic idea graphs, video-analysis pipelines, privacy controls, moderation, and progression loops.

ADGO Studios | Co-Founder / Creative and Automation Developer | **Present**

- Develop websites and creative workflows for image and video generation, advertising assets, lead capture, CRM operations, and automation.

SKILLS

Development: TypeScript, JavaScript, React, Next.js, Expo, React Native, Python, Supabase, PostgreSQL, Vercel, GitHub, APIs

Product: Product ideation, rapid prototyping, responsive interfaces, authentication, database-backed applications, deployment, debugging, iteration

AI and automation: LLM integration, prompt design, image generation, video generation, workflow automation, computer vision workflows

ADDITIONAL EXPERIENCE AND EDUCATION

The Home Depot | Hardware Sales Associate | May 2025 - Present

Chatsworth Products Incorporated | Manufacturing Technician | Nov 2024 - May 2025

Mosquito Squad | Pest Control Technician | May 2023 - Oct 2024

Earlier retail and security roles | 2017 - 2023

Granada Hills Charter High School | High school diploma | 2016
