PROFESSIONAL SUMMARY

Applied AI developer who designs and ships full-stack AI products: an LLM extraction pipeline with schema validation and human review, a computer-vision measurement engine, and a generative-audio platform. Also sets up AI phone reception, CRM automation, and websites for local businesses. Builds with AI coding tools while owning architecture, testing, and deployment.

CORE SKILLS

Applied AI: Claude and OpenAI APIs, structured output with schema validation (Zod), embeddings and vector search, MediaPipe, NumPy, ElevenLabs, voice AI

Development: TypeScript, JavaScript, Python, React, Next.js, Expo/React Native, FastAPI, Supabase, PostgreSQL (RLS), GitHub Actions, Vercel, Cloudflare

Business automation: GoHighLevel CRM, lead capture, scheduling, follow-up workflows, Meta Ads Manager, Higgsfield, HyperFrames

AI PROJECTS

- **Civic Mirror** - Claude pipeline turns ballot pamphlets into Zod-validated, cited drafts with human review before publishing; bilingual Next.js/Supabase app with row-level security and CI.
- **Jump Trainer** - Python/MediaPipe engine measures vertical jump from phone video using flight-time physics, confidence ranges, clip rejection, and versioned algorithms; Expo mobile app.
- **Raidio** - AI-generated music and voice-host radio network; synchronized wall-clock playhead; failure-tolerant generation. Next.js and Supabase.
- **Co-Lab** - LLM routing and embeddings-based vector search link ideas into an idea network; batched classification controls AI costs.
