SUMMARY

Hands-on website, application and automation projects paired with customer service and practical troubleshooting experience. Seeking an entry point into a long-term tech career.

SELECTED PROJECTS

Aurora Pool & Spa | Client website

Astro site with responsive service pages, location details, contact flows, optimized media and SEO.

ADGO Studios | Web and automation work

Co-founded a small studio; worked on website development, GoHighLevel CRM setup, lead intake and an AI voice receptionist offering information and consultation bookings.

PSYCH! Open Source | Publishing platform

Next.js reading experience with episodes, archive, timeline, progress tracking and spoiler controls.

Raidio | Full-stack music project

Next.js and Supabase radio prototype with synchronized playback, station programming and AI audio.

EXPERIENCE

ADGO Studios | Co-founder, web and automation projects | 2026 - present

Built and configured business websites and workflows; coordinated project requirements with clients. Tested web forms, automation flows and customer-facing tools with a collaborator.

The Home Depot | Hardware Sales Associate | 2025 - present

Assist customers in hardware, plumbing and electrical; explain options in English and Spanish. Troubleshoot practical problems and work across departments to find solutions.

Earlier work | Manufacturing, pest control and field service

Hands-on technical and customer-facing work, following processes and resolving on-site issues.

SKILLS

Web: JavaScript, TypeScript, React, Next.js, Astro, responsive design, APIs
Data & hosting: Supabase, PostgreSQL, GitHub, Vercel, Cloudflare
Business systems: GoHighLevel, CRM, forms, voice AI, workflow automation

EDUCATION

Granada Hills Charter High School | Diploma, 2016
